## ABOUT

**Pig Inu (PIG)** is uniquely designed token and its DeFi services deployed on Polygon (MATIC) Network.

### Smart contracts:

- **Token**
- **Presale**
- **Staking pools**
- **Airdrop**

### Tokenomics:

- **Total supply:** 10,000,000 PIG
- **Transaction fees:**
  - **Dev wallet fee** - 3%
  - **Burn fee** - 2%
- **Transaction fees exceptions:** Presale and Airdrop

# PIG INU

## **FAIR LAUNCH**

Total supply will be redistributed to 3 smart contracts right after deploying on Polygon (MATIC) Network:

- **Presale contract** – 7,500,000 PIG
  - max. 5,000,000 for buyers (presale price: 1 USD / PIG)
  - max. 2,500,000 for liquidity (initial price: 2 USD / PIG)
- **Airdrop contract** – 500,000 PIG (will be available only for wallets with balance at least **10 MATIC** or more for security reasons)
- **Staking contract** – 2,000,000 PIG

- **Presale** - Unsold tokens from are burned

- **Airdrop** - Tokens not distributed during airdrop period are burned

# **PIG INU**

## CONTRACTS AND ITS PHASES

- **Presale:**

- Investors can buy PIG tokens for discounted fixed price **1 DAI / 1 PIG** for limited time period of **30 days** (deposit period).
- **Deposit period** – investors can deposit their **DAI** tokens and wait until deposit period is over
- **Claim period** - right after deposit period is over, investors can claim their **PIG** tokens for their deposited **DAI**. This period lasts for **30 days**. When the first investor claims their **PIG** tokens, the liquidity for **PIG / DAI** is created automatically from 50% of deposited **DAI** from all investors for initial price **2 DAI / 1 PIG**, the other 50% of deposited **DAI** goes to developers' wallet for marketing and development purposes.
- **After claim period is over** – all unclaimed **PIG** tokens are burned.

- **Airdrop:**

- When the Presale deposit period is over and liquidity is created, the airdrop starts. Anyone can claim **1 PIG token per unique wallet address** for limited time period (**30 days**).
- After this period is over, no one can claim **PIG** tokens anymore and undistributed **PIG** tokens are burned.

- **Staking pools:**

- Anyone who has their **PIG**, **PIG-DAI LP** or **DAI** tokens, can lock any amount of it in staking pools. They can withdraw them anytime. Each staking pool emits **0.1 PIG** per block until the pool contract balance is drained. These tokens are redistributed to all stakers depending on their share in the pool.

# PIG INU

## ROAD MAP

- **Phase 1:**
  - Project launch
  - Website and whitepaper release
  - Initial marketing
  - Presale - deposit phase – **30 days**
  - Unsold tokens burned after deposit phase is over
- **Phase 2:**
  - Presale – claim phase – **30 days**
  - Initial liquidity created from presale deposits
  - Airdrop launch
  - Unclaimed tokens from presale burned after claim phase is over
  - Marketing and awareness push

## **FUTURE PLANS**

- Create a decentralised **gambling games** (dice, wheel of fortune, roulette etc.), where you can bet **PIG** tokens and win
- Create an **NFT game** where you can buy NFTs for **PIG** tokens
